

This document will cover the following things

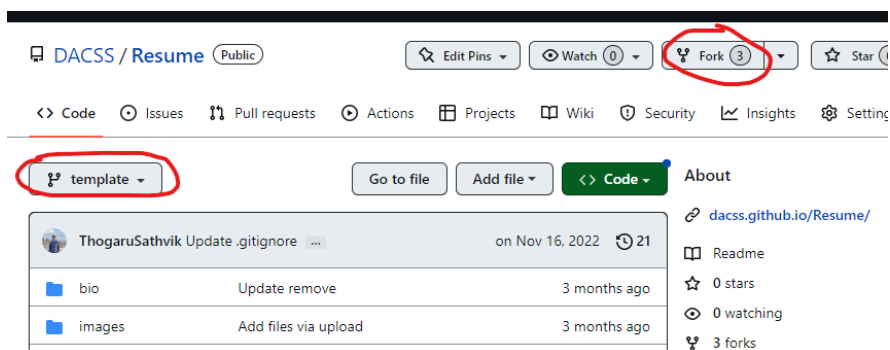

1. How to submit a file to github
2. What files we need from you
3. How to structure your .rmd file

It is assumed that students know the basics of RMarkdown, Github and basics of using RStudio. Students currently enrolled in/completed the DACSS 601 must face no difficulties. If you are stuck, here are some helpful guides:

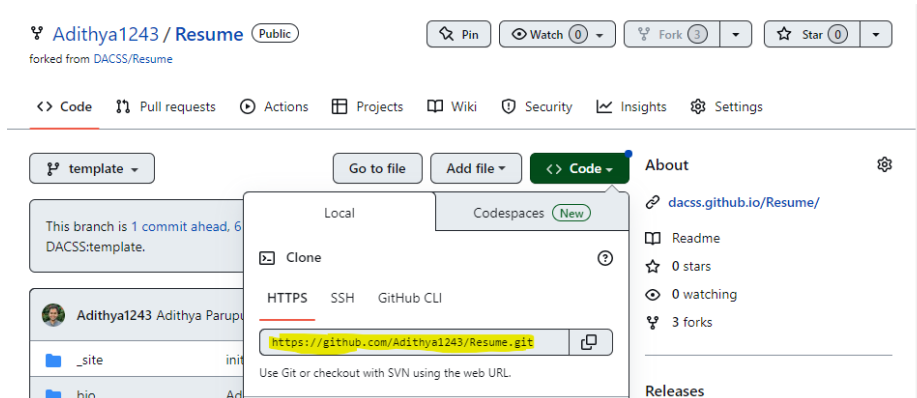

- Markdown documentation – <https://www.markdownguide.org/basic-syntax/>
- Github and RStudio integration – <https://happygitwithr.com/rstudio-git-github.html>

How to submit a file to github

1. Go this link: <https://github.com/DACSS/Resume> and fork the **template** branch.

2. Copy the repo link and create a new R project in your local machine

3. Once files have loaded, open the /bio folder
 - a. Create a new folder in your name like – FirstnameLastname, AdithyaParupudi, NiyatiSharma and so on
 - b. Upload 3 things
 - i. Most recent Resume – rename it to cv.pdf
 - ii. Your profile photo (must be a head shot)
 - iii. A customised .rmd file
4. Commit these new files → Push them to Github → Raise a pull request to **main** branch
5. We will review it and let you know if further changes need to be made.

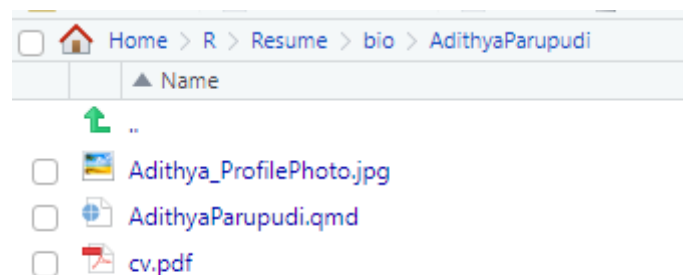

6. Congratulations! You have successfully completed the task

Points to note:

- Fork the template branch, create pull request into main branch
- Under /bio folder, create a folder in your name in the specified format

What files we need from you

1. Most recent Resume – rename it to cv.pdf
2. Your profile photo (must be a head shot) – this is so that your face is clearly visible in the website.
3. A customised .rmd file

How to structure your .rmd file

Inside the /bio folder you will find a template which you can follow.

1. Open the /FirstnameLastname folder to find 3 files. Pick the **bio_template.qmd** and start editing
2. Follow the instruction in the below screenshots
 - Please make changes as shown. Add a title, email in your description, and also update your LinkedIn and github

```
---
title: "Adithya Praneeth Parupudi"
description: "Email : aparupudi@umass.edu"
image: Adithya_ProfilePhoto.jpg
about:
  links:
    - text: LinkedIn
      icon: linkedin
      url: "https://linkedin.com/in/adithya-parupudi"
    - text: GitHub
      icon: github
      url: "https://github.com/Adithya1243"
categories: [fall123, part-time, healthcare, finance, public-policy]
---
```

- **Very important** The categories field is very important. Please make sure to have the following elements.

- i. **Graduation-month-year:** If a student is graduating in Fall 2023, mention – fall23. In Spring 2024, then mention – spring24
- ii. **Internship/Full-time:** Mention internship if you are looking for internship and full-time if looking for fulltime
- iii. **Domains which interest you:** We have prepared a list of domains which students expected to use. Please do not come up with your own names. We will separately inquire about more options directly with the students. Please do not worry if you do not see your domain. We will make every effort to incorporate your suggestions. Here is the current list of domains:

healthcare
operations
finance
research
it-services
supply-chain
environmental
poli-sci
public-policy
psychology

This is how the final categories text will look like. Feel free to edit this in your own .rmd file

Categories: [spring24, full-time, healthcare, operations, finance, research, poli-sci]

3. Please make changes in the highlighted parts

```
30
31 <a href = "cv.pdf" title = "Adithya Resume"> <button type="button" class="resume btn bg-success btn-lg w-100"> <i class="bi
bi-cloud-download"></i> Resume </button> </a>
32
33 <!-- ::: column-page -->
```

Add your CV name and title

4. Please fill under the appropriate headings. One can either paste content directly from their existing resume or customise it here. Please take care of formatting as markdown

```
::: panel-tabset
# Summary
# Education
# Technical Skills
# Work Experience
# Projects
# Volunteering
:::
```

files have a different syntax for bullet points, hyperlinks and attaching images. Refer to the link provided top.

5. Under the Projects section, add a hyperlink to your GitHub pages so that recruiter can directly look at the projects.
 - Please maintain a brief summary of each project in your github pages

Projects

```
- [EDA of NIFTY50 Dataset (Aug 2022)](https://github.com/Adithya1243/DACSS\_601\_August2022\_v2/blob/template/posts/FinalProject\_AdithyaParupudi.qmd) - Using R, analysed the stock trends of top 50 Indian stocks between 2000 and 2021, performed time series analysis of the stock performance; best and worst stocks; and observed stock trends in 2008 and 2019-2021

- [Structural Topic Modeling of Celebrity Personality Trends](https://github.com/Adithya1243/Text\_as\_Data\_Fall\_2022/tree/template/posts)- Conducted a comprehensive case study of 100 famous people, revealing patterns in personality traits and contextualizing findings through demographic, professional, and background characteristics. Built using R, topic modeling, and the tidyverse package.
:::
```

This is an example of how a hyperlink works in markdown.
